

Talk Topics – Michelle J. Johnson

1. Global Future of Robot-Assisted Neurorehabilitation: How do we overcome barriers to technology penetration in low and middle income countries?
2. Technology-assisted motor re-learning in patients with both cognitive and motor impairment.
3. Development of low-cost, re-configurable, robots for neurorehabilitation
4. Diversity and Inclusion in the development of rehabilitative and assistive robots and other technologies
5. Leveling the playing field: How can machine learning and robotics improve access to rehabilitation?
